MY COMMISSION EXPIRES MARCH 31, 1982

My Commission Expires:

JFK EXHIBIT F-522

-JFK EXHIBIT F-522-

Project ZRRIFLE

1. Identification: The purpose of Project ZRRIFLE is to spot, develop, and use agent assets for Division D operations. Agents will be spotted in several areas, including the United States, but site tests for operational security reasons will probably not be used in their country of residence. Present developmental activity is being conducted in the WE and EE areas, but it is anticipated that this will be extended to other Division areas. The project will be operated against third-country installations and personnel.

2. Objective: The objective of this project is the procurement of foreign code and cipher materials and information concerning and methods, in accordance with requirements levied on the Clandestine Services, principally by the National Security Agency. Since these requirements are subject to frequent revisions, any listing of targets would be valid for the duration of the project. Specific operations will be mounted on the basis of need and opportunity. The project will be conducted by Division D with assistance from area Divisions and stations as needed.

3. Background: In response to the increasing requirements for the operational procurement of foreign code and cipher materials, Division D in 1968 began the spotting of agent assets as a developmental activity. During the same

period requirements from NSA became more refined and in many respects more sensitive. Bureaus most stations are not equipped to conduct this type of operation and because of the desirability of completely centralized control over this entire effort, it was determined that Division D, which is in closest touch with NSA on procurement requirements, could best conduct the activity. The ~~first~~ spotting activity has now advanced far enough to justify removing from the OIA category.

4. Operational assets:
